## 1. Objetivo

El objetivo del presente procedimiento es describir cómo se realiza la gestión post-comercialización de los productos sanitarios de suministrados por Spika Tech, en adelante SPIKA.

Según lo establecido en el Reglamento 2017/745 sobre productos sanitarios, el sistema de seguimiento post comercialización deberá ser adecuado para recabar, conservar y analizar activa y sistemáticamente datos pertinentes sobre calidad, funcionamiento y seguridad de un producto durante todo su ciclo de vida, extraer las conclusiones pertinentes y determinar, aplicar y supervisar cualquier actuación preventiva y correctiva.

## 2. Alcance

Es de aplicación este procedimiento a todos los productos sanitarios suministrados en SPIKA.

## 3. Responsabilidades y Departamentos afectados

| Departamento | Aplica | |
|---|---|---|
| | Si | No |
| Director Ejecutivo | ☒ | ☐ |
| Garantía de Calidad | ☒ | ☐ |
| IT & Robótica | ☐ | ☒ |
| Investigacion & Desarrollo | ☐ | ☒ |
| Ventas | ☐ | ☒ |

## 4. Definiciones y Acrónimos

- **Producto Sanitario (PS):** todo instrumento, dispositivo, equipo, programa informático, implante, reactivo, material u otro artículo destinado por el fabricante a ser utilizado en personas, por separado o en combinación, con alguno de los siguientes fines médicos específicos:
  - diagnóstico, prevención, seguimiento, predicción, pronóstico, tratamiento o alivio de una enfermedad,

- diagnóstico, seguimiento, tratamiento, alivio o compensación de una lesión o de una discapacidad,
- investigación, sustitución o modificación de la anatomía o de un proceso o estado fisiológico o patológico,
- obtención de información mediante el examen in vitro de muestras procedentes del cuerpo humano, incluyendo donaciones de órganos, sangre y tejidos, y que no ejerce su acción principal prevista en el interior o en la superficie del cuerpo humano por mecanismos farmacológicos, inmunológicos ni metabólicos, pero a cuya función puedan contribuir tales mecanismos.

- **Sistema de vigilancia de productos sanitarios:** El Sistema de Vigilancia de productos sanitarios se refiere a la notificación de los incidentes adversos acaecidos con productos sanitarios, a su registro y evaluación, a la adopción de las medidas oportunas en orden a la protección de la salud y a la transmisión de estas medidas a los agentes interesados.
- **Incidente**: Todo funcionamiento defectuoso o deterioro de las características o el funcionamiento de un producto comercializado, incluidos los errores de uso debidos a características ergonómicas, así como cualquier inadecuación de la información facilitada por el fabricante o cualquier efecto colateral indeseable.
- **Incidente Grave:** Para comunicar un incidente, es necesario que esté asociado con un producto sanitario o con la información proporcionada con el producto sanitario y que el incidente sea tal, que haya producido la muerte o un grave deterioro en la salud, o bien que si ocurre de nuevo pueda causarlos.

Los tipos de incidentes adversos que deben comunicarse son los siguientes:

1. Los que dan lugar a muerte
2. Los que dan lugar a un deterioro grave del estado de salud del paciente, usuario u otra persona, como, por ejemplo:

a) Enfermedad o lesión con amenaza para la vida

b) Deterioro permanente de una función corporal o daño permanente de una estructura corporal

c) Proceso que necesita una intervención médica o quirúrgica para evitar un deterioro permanente de una función corporal o un daño permanente de una estructura corporal

3. Los incidentes potenciales, que son aquellos que podrían haber dado lugar a la muerte o un grave deterioro de la salud, pero que no se han producido debido bien a circunstancias afortunadas o a la intervención del personal sanitario.

# 5. Procedimiento

## 5.1. Introducción y generalidades

SPIKA en calidad de Fabricante cumplirá con los requerimientos sobre vigilancia de productos sanitarios que se establezca en la legislación vigente aplicable para los productos de Clase IIa del que es fabricante.

La información sobre incidentes adversos relacionados con los productos sanitarios fabricados por SPIKA podrá provenir de:

- Profesionales sanitarios, directamente o a través de cualquier empleado de SPIKA o de empresas de servicios contratadas por SPIKA
- Pacientes, usuarios o particulares profesionales sanitarios, directamente o a través de cualquier empleado de SPIKA o empresas subcontratadas por SPIKA
- Compañías con las que SPIKA tuviera acuerdos con respecto a la comercialización
- Autoridades sanitarias reguladoras

En el caso de recibir estas informaciones se tramitará un informe de reclamación según el **PNT-007 Gestión de Reclamaciones** y se investigarán las causas, consecuencias y acciones correctivas a implementar en caso necesario.

En SPIKA se elabora un plan de seguimiento post-comercialización que atenderá a la recogida de la siguiente información:

- Información relativa a incidentes graves, gestionados estas mediante el **PNT-007 Gestión de Reclamaciones**
- Registros referentes a incidentes no graves o datos de efectos indeseables del producto
- Bibliografía, bases de datos y/o registros especializados o técnicos pertinentes
- Información, incluidos los comentarios y reclamaciones de los usuarios, distribuidores e importadores´

- Información pública sobre productos sanitarios similares

Este plan de seguimiento incluye búsquedas proactivas y sistemáticas para recabar toda la información mencionada anteriormente lo que permitirá caracterizar el comportamiento del producto y compararlo con productos similares ya comercializados.

## 5.2. Gestión de incidentes y notificación a las autoridades sanitarias

SPIKA gestionará los incidentes comunicados mediante el **PNT-007 Gestión de Reclamaciones,** en cuanto se detecte un incidente deberá remitirse un informe inicial a la autoridad nacional competente donde ha ocurrido dicho incidente.

Se notificarán a las autoridades los incidentes categorizados como graves. Los productos fabricados por SPIKA son de Clase IIa, no obstante, se realizará un seguimiento y cualquier notificación se realizará por el formulario incluido en el **Anexo 1** – MIR Manufacturer Incidente Report for Serious incidents and Incidents versión en vigor.

Será el Técnico Responsable el encargado de realizar las comunicaciones con las Autoridades sanitarias.

## 5.3. Plazos de comunicación

SPIKA tiene la obligación de notificar un incidente grave confirmado inmediatamente después de que se haya establecido causalidad del incidente con el producto o se haya establecido que dicha relación de causalidad es razonablemente posible, y a más tardar en 15 días después de tener conocimiento del incidente.

Se pueden presentar informes preliminares incompleto seguido luego el informe completo.

## 5.4. Plan de seguimiento e informe

SPIKA se compromete a realizar semestralmente un informe con el siguiente contenido:

- Información relativa a incidentes graves, gestionados estas mediante el **PNT-007 Gestión de Reclamaciones,** se enumerarán las reclamaciones recibidas indicando causa raíz y CAPAs asociadas, así como si tienen asociados incidentes de vigilancia o si son defectos de calidad.
- Registros referentes a incidentes no graves o datos de efectos indeseables del producto
- Bibliografía, bases de datos y/o registros especializados o técnicos pertinentes, se realizarán búsquedas de:

- Notas Informativas que pudieran aparecer publicadas en las páginas web de las Autoridades Sanitarias de productos sanitarios (EMA y AEMPS), y en la OMS.
- Publicaciones relevantes en cuanto a seguridad en PubMed (http://www.ncbi.nlm.nih.gov/pubmed/), serán revisadas para estar alerta de posibles incidentes.

- Información, incluidos los comentarios y reclamaciones de los usuarios, distribuidores e importadores´
- Información pública sobre productos sanitarios similares

La información recogida en estos informes nos permitirá realizar una verificación de la consistencia del producto en lo referente a seguridad, eficacia y calidad, poniendo de manifiesto posibles tendencias y permitirá identificar de forma clara las mejoras que se deben poner en práctica, evaluando de forma constante el beneficio riesgo, el proceso de fabricación y por tanto la calidad del producto final. Podrá aumentarse la frecuencia de este informe si en dos informes sucesivos no se encuentran riesgos potenciales ni peligros relacionados con el producto aumentando en seis meses más la frecuencia de realización del informe, por ejemplo: tras 2 informes semestrales sin potenciales riesgos el informe se realizará cada año y así sucesivamente.

## 6. Distribución del Procedimiento

El personal perteneciente a los departamentos indicados en el Apartado 3 (Responsabilidades y Departamentos afectados), se les debe proporcionar copia del presente procedimiento. Además, la copia controlada nº1 será entregada al Archivo para su archivo en papel.

Copias controladas a emitir:

| Nº Copia controlada | Departamentos |
|---|---|
| 1 | Archivo |

## 7. Anexos

| NÚM. / REV. | TÍTULO |
|---|---|
| 1/01 | Formulario MIR Manufacturer Incident Report |

## 8. Documentación relacionada

Anexo 1_VERSION_01

## Section 3: Incident information derived from healthcare professional/facility/patient/lay user/other

### 3.1 Nature of incident

a. Provide a comprehensive description of the incident, including (1) what went wrong with the device (if applicable) and (2) a description of the health effects (if applicable), i.e. clinical signs, symptoms, conditions as well as the overall health impact (i.e. Death; life-threatening hospitalisation – intact or prolonged; required intervention to prevent permanent damage; disability or permanent damage; congenital anomaly/birth defects; indirect harm; no serious outcome)

### 3.2 Medical device problem information

a. IMDRF Medical device problem codes (Annex A)
Coding with IMDRF terms is a mandatory requirement.

| | Choice 1 (most relevant) | Choice 2 | Choice 3 | Choice 4 | Choice 5 | Choice 6 |
|---|---|---|---|---|---|---|
| IMDRF 'Medical device problem codes' | Code | Code | Code | Code | Code | Code |

If you think the incident is unique and a suitable IMDRF term is missing, briefly explain:

b. Number of patients involved

c. What is the current location of the device?

- Healthcare facility/carer
- Distributor
- Patient/user
- Discarded
- In transit to manufacturer
- Remains implanted
- Manufacturer
- Unknown
- Other:

d. Operator of device at the time of the incident

- Healthcare professional
- Patient/lay user
- Other, please describe

e. Usage of device (as intended)

- Initial use
- Reuse of a single use medical device
- Reuse of a reusable medical device
- Re-serviced/refurbished/fully refurbished
- Problem noted prior use
- Other:

f. Remedial actions taken by healthcare facility, patient or user subsequent to the incident

Anexo 1_VERSION_01

| 3.3 | Patient information |
|---|---|
| a | IMDRF 'Health Effect' terms and codes (Annex E, F)<br>Coding with IMDRF terms is a mandatory requirement. |

| | Choice 1 (most relevant) | Choice 2 | Choice 3 | Choice 4 | Choice 5 | Choice 6 |
|---|---|---|---|---|---|---|

|---|---|---|---|---|---|---|
| IMDRF 'Component' codes (Annex G) | Code | Code | Code | Code | Code | Code |

If you think the incident is unique and a suitable IMDRF term is missing, briefly explain:

**g** Description of remedial action/corrective action/preventive action/field safety corrective action (FSCA)
(For a FSCA, fill in the FSCA form)

**h** Time schedule for the implementation of the identified actions

**i** Final comments from the manufacturer on cause investigation and conclusion

Anexo 1_VERSION_01

| | |
|---|---|
| **4.3** | **Similar incidents (for Final (Reportable incident))** |
| **4.3.1** | **Use of IMDRF terms and codes for identifying similar incidents** |
| a | Identification of similar incidents using IMDRF Adverse Event Reporting terms and codes<br>Tick-mark which code or combination of codes were used for identifying similar incidents. |

| | Choice 1 |
|---|---|
| IMDRF code relating to most relevant 'Medical device problem' (Annex A) | ☐ |
| IMDRF code relating to most relevant 'Investigation finding' (Annex C, 'Cause investigation') | ☐ |

☐ Other – enter description of what similar incidents are based on and the rationale why the above IMDRF codes were not used

| | |
|---|---|
| **4.3.2** | **Use of in-house terms/codes for identifying similar incidents (only for transition period)** |
| a | If similar incident were not identified by IMDRF codes but by in-house codes, please provide the codes and terms below. |

| | Choice 1 | |
|---|---|---|
| Code/term for most relevant medical device problem | Code | |
| | Term | |
| Code/term for most relevant root cause evaluation | Code | |
| | Term | |

☐ Other – enter description of what similar incidents are based on and the rationale why the above codes were not used

| | |
|---|---|
| **4.3.3** | **Number of similar incidents and devices on the market** |
| a | Indicate on which basis similar incidents were identified regarding the device or device variant:<br>○ Model ○ Software ○ Lot/Batch ○ Product platform ○ Other variant<br>Details of the selection made above |
| b | Indicate to what criteria the number of devices on the market (also known as denominator data) is based on (tick the most appropriate):<br>○ Devices placed on the market or put into service<br>○ Units distributed within each time period<br>○ Number of tests performed<br>○ Number of episodes of use (for reusable devices)<br>○ Active installed base<br>○ Units distributed from the date of declaration of conformity/CE mark approval to the end date of each time period<br>○ Number of devices implanted<br>○ Other -describe |

Anexo 1_VERSION_01

| c | Enter the number of similar incidents and devices on the market for the indicated time periods<br>You must use yearly time periods unless:<br>A: a different time period has been specified by the European vigilance Working Group<br>B: the device has not been on the European market for more than three years |
|---|---|
