4.4. Verification and closure 6
5. Distribution of Procedure 6
6. Annexes 7
7. Related documentation 7
8. Formation 7

1. Aim

Ensure that SPIKA systematically evaluates and implements changes in standards, laws, and regulatory requirements applicable to its products, ensuring continued compliance with:

- Regulation (EU) 2017/745 (MDR).
- ISO 13485:2016.
- Other applicable regulations (FDA, national, etc.).

2. Scope

It applies to all of the organization's procedures related to the implemented quality management system.

2.1. Responsibilities and Departments Affected

The affected departments are:

Department	Apply	
	Yeah	No
Address	☒	☐
Environment	☐	☒
Quality Assurance	☒	☐
Systems and Cybersecurity	☒	☐
Research and Development	☐	☒
Marketing and Sales	☐	☒
Management	☐	☒

3. Definitions and Acronyms

- Regulatory change : Modification in applicable laws, regulations, standards or guidelines .
- Impact assessment : Process to determine whether a regulatory change affects the organization's product, documentation or processes
- AEMPS : Spanish Agency for Medicines and Health Products .
- BOE : Official State Gazette
- OJEU : Official Journal of the European Union
- MDR: Medical Device Regulation
- NB : Notified *Body*

4. Procedure

4.1. Identification of regulatory changes

To identify regulatory changes, active monitoring is carried out through periodic review of official sources:

- Official Journal of the EU (quarterly)
- AEMPS website (quarterly)
- Publications of notified bodies (quarterly)
- ISO Standards Updates (Quarterly)

4.2. Assessment of relevance and impact

When a potential change is identified, the following actions are taken:

1. The detected change is recorded in the online regulatory change detection form.
2. The team responsible for the quality management system and regulatory documents performs a preliminary analysis to determine:
    a. If it affects products (by type, class or market)

b. The degree of impact (high, medium or low)

c. The deadlines for implementing the change

4.3. Planning and implementation

For changes that require action, a specific action plan is made that includes:

- Documents to be updated (ETM, procedures, etc.).
- Necessary process modifications.
- Staff training needs.
- Realistic implementation deadlines.

4.4. Verification and closure

Once all the changes have been implemented to comply with the regulatory changes, the effectiveness of the change is verified by:

- Internal audits
- Review of document samples
- Surveys of trained personnel

5. Distribution of the Procedure

Staff members in the departments listed in Section 3 (Responsibilities and Affected Departments) must be provided with a copy of this procedure. In addition, controlled copy No. 1 will be submitted to the Archives for paper archiving.

Controlled copies to be issued:

Controlled Copy No.	Departments
1	Archive

6. Annexes

NO. / REV.	QUALIFICATION
N/A	N/A

7. Related documentation

Code	QUALIFICATION
N/A	N/A

8. Training

This version requires that the affected departments indicated in section 3 receive the following training:

Mark with an X	Type of training
☒	**Theoretical** (reading and understanding of the procedure)
☐	**Theoretical – Practical** (If you select this option, contact the Responsible Technician)
