4. Definitions and Acronyms 5
5. Procedure 5
5.1 Support services 6
6. Distribution of Procedure 6
7. Annexes 6
8. Related documentation 7
9. Formation 7

1. Aim

The objective of this procedure is to describe the infrastructure of Spika Tech, hereinafter SPIKA, for carrying out medical device activities, their maintenance, environmental conditions

2. Scope

This procedure applies to the infrastructure for carrying out medical device activities, their maintenance, and environmental conditions.

3. Responsibilities and Departments Affected

It is the responsibility of Quality Assurance to keep this procedure up to date.

The affected departments are those indicated in the following table:

Department	Apply	
	Yeah	No
Address	☒	☐
Environment	☒	☐
Quality Assurance	☒	☐
Systems and Cybersecurity	☒	☐
Research and Development	☒	☐
Marketing and Sales	☒	☐
Management	☒	☐

4. Definitions and Acronyms

- Medical device: any instrument, device, equipment, software, implant, reagent, material or other article intended by the manufacturer to be used on humans, separately or in combination, for any of the following specific medical purposes:
  - diagnosis, prevention, monitoring, prediction, prognosis, treatment or relief of a disease,
  - diagnosis, follow-up, treatment, relief or compensation for an injury or disability,
  - Research, replacement or modification of anatomy or of a physiological or pathological process or state, obtaining information by means of in vitro examination of samples from the human body, including organ, blood and tissue donations, and which does not perform its principal intended action inside or on the surface of the human body by pharmacological, immunological or metabolic mechanisms, but to whose function such mechanisms may contribute .

5. Procedure

SPIKA is located on the campus of the Rey Juan Carlos University (https://www.urjc.es/). The campus has a library and several teaching and research laboratories, as well as the Technology Support Center and the University Rectorate. The campus is 280 square meters.

At this headquarters located in Madrid, the software is developed using a storage systems architecture on the GitHub electronic platform (https://github.com/)

Number of servers: 38 portable servers located at SpikaTech's offices on the Rey Juan Carlos University campus in Móstoles (except for remote workers or those based outside of Rey Juan Carlos University, whose servers are hosted at their off-site workplace).

Type of connections/services: All types of connections are made wirelessly or via Wi-Fi connection cable.

Backups: All data available from the vr-cardio application is backed up to a database located in Firebase (https://firebase.google.com/?hl=es-419)

5.1 Support services

There is an IT department that can provide 24-hour technical support for both internal and external support (potential customers).

6. Distribution of the Procedure

Staff members in the departments listed in Section 3 (Responsibilities and Affected Departments) must be provided with a copy of this procedure. In addition, controlled copy No. 1 will be submitted to the Archives for paper archiving.

Controlled copies to be issued:

Controlled Copy No.	Departments
1	Archive

7. Annexes

NO. / REV.	QUALIFICATION
N/A	N/A

8. Related documentation

Code	QUALIFICATION
MQ-01	Quality Manual
N/A	UNE EN ISO 13485

9. Training

This version requires that the affected departments indicated in section 3 receive the training indicated below:

Mark with an X	Type of training
☒	**Theoretical** (reading and understanding of the procedure)
☐	**Theoretical – Practical** (If you select this option, contact the Responsible Technician)
