1. Target

The purpose of this procedure is to describe the methodology to be followed in the initial and ongoing training of Spika Tech, hereinafter SPIKA, personnel to ensure that all personnel are prepared to perform their assigned functions.

In the same way, the aim of this procedure is to ensure that all personnel involved in the production activities of all the production phases of SPIKA TECH products are adequately trained in the knowledge of the applicable regulations.

2. Outreach

This procedure applies to all personnel involved in SPIKA's production activities.

3. Responsibilities and Departments concerned

The Management, or the person delegated by it, in collaboration with the different departments, is responsible for ensuring that staff are qualified and trained for the correct performance of their duties.

Although no fixed annual training plans are drawn up, the company maintains a flexible and needs-based approach, organising training activities as gaps, regulatory, technological or procedural changes are detected.

Management should provide the necessary resources to carry out such training when deemed appropriate.

Department heads are responsible for:

- Detect and communicate the training needs of your team.
- Organise or coordinate appropriate training actions (internal or external).
- Evaluate the use and effectiveness of the training activities carried out.
- Record staff participation and compliance.

The Responsible Technician, together with the heads of the departments, must ensure that the training actions carried out are documented and verified, guaranteeing that the personnel maintain the necessary competences for the development of their tasks.

The departments concerned are listed in the table below:

Department	Applies	
	Yes	No
Address	☒	☐
Environment	☒	☐
Quality Assurance	☒	☐
Systems and Cybersecurity	☒	☐
Research and Development	☒	☐
Marketing and Sales	☒	☐
Management	☒	☐

4. Definitions and Acronyms

- Training: Period of time during which the worker is being prepared to assume the tasks of his job under the responsibility and supervision of the trainer.
- Training Plan: Annual proposal defining both internal and external training for employees. These plans are developed by department.
- Internal Training: Specific training for a specific position, which is received in the company itself and given by SPIKA TECH personnel. Within this type of training activity are all those included in the training procedures for the qualification of positions and activities in the different areas of the company. This Internal Training must be continuous.
- External Training: This is training that is obtained from outside; it is training for the improvement or optimisation of the performance of employees in their jobs and tasks, and is carried out by personnel from outside the SPIKA TECH organisation, in its facilities or outside them.
- HR: human resources

- SOP: Standard Operating Procedure

5. Procedure

5.1. Introduction

SPIKA personnel must be qualified and trained for the correct performance of their duties. Each employee will have an individual record documenting the training received both on joining and throughout their time at the company. SPIKA does not draw up closed annual training plans, but maintains a dynamic management based on the training needs detected, organising the relevant actions when deemed necessary.

5.2. Training plans

Training actions can be internal or external, face-to-face or telematic. When a training need is detected, whether due to incorporation, change of position, updating of procedures or continuous improvement, the employee is informed of the training to be carried out.

Once the training has been completed, the worker must register their participation and use through a digital form (Google Forms) enabled for this purpose, which allows traceability and automatic archiving.

5.3. Initial training

Initial training is offered to all new employees. It will include an introduction to the quality system, the procedures applicable to their position and a practical part under supervision.

Although no paper forms are used, compliance with this training is documented on the form provided.

During the initial period, the worker will perform his/her duties under the supervision of a tutor.

5.4. Continuous training

Continuous training is offered on a regular basis or according to identified needs. These may be due to:

- Changes in procedures.
- Changes in the workplace.
- Reinstatements after prolonged absences.
- Continuous improvement or technological evolution.

5.5. Procedural training

When procedures are issued or updated, training is required for the staff involved. There are three types of training in procedures:

- Theoretical: requires reading and understanding of the procedure, which will be done by reading the corresponding controlled copy.
- Theoretical plus quiz: requires reading and understanding of the procedure and passing the related quiz, which must be passed with at least 80% of the questions correct.
- Theoretical-practical: requires reading and understanding of the procedure plus practical training in the procedure. In this case, the practical training must be carried out before the procedure is put into effect. Anyone undergoing initial training who comes across a procedure with this type of training marked on it should contact the Responsible Technician.

5.6. Courses/training

There are three types of courses or training:

- Internal: by means of courses and lectures given to employees by internal or external SPIKA staff, but always on SPIKA premises.
- External: by attending courses or conferences outside SPIKA's premises.
- On-line: by attending courses or conferences telematically.

Registration is always done through the Google form, which allows you to collect name, date, type of training, content and effectiveness.

5.7. Training evaluation

Whenever possible, at least one questionnaire shall be required in order to assess the employee's benefit from the training course. This questionnaire shall be managed by the person delivering the training course and shall be attached to the training registration form.

5.8. Re-qualification of staff

In the event that the employee spends more than 6 months away from his or her regular job, training must be arranged upon re-incorporation as if it were initial training. Staff who remain on the job without being off work for more than 6 months are considered to be trained through the continuous training described above.

When a person in the organisation changes jobs, he/she must carry out a complete re-qualification for the new job as if it were an initial one, he/she may be exempted from reading and understanding the common procedures of both jobs, but the specific ones of the new job to be carried out must be read and understood.

5.9. Archiving of documentation

The Quality Department will be responsible for the management and custody of the documentation generated from both initial and continuous training. Therefore, this department must be informed of any change of job position, and of any personnel joining or leaving the company,

When staff leave the organisation, documentation shall be retained for a maximum of 5 years, after which it may be destroyed.

6. Distribution of the Procedure

Staff belonging to the departments listed in Section 3 (Responsibilities and Departments concerned) should be provided with a copy of this procedure. In addition, controlled copy no. 1 will be given to the Archives for archiving on paper.

Controlled copies to be issued:

No. Controlled copy	Departments
1	Archive

7. Related documentation

Code	TITLE
MQ-01	Quality Manual
PNT-001	Document management and archiving
PNT-011	Job descriptions

8. Training

This version requires the following training for the departments concerned as indicated in paragraph 3:

Mark with an X	Type of training
☒	**Theoretical** (reading and understanding of the procedure)
☐	**Theoretical - Practical** (If this option is selected, please contact the Technician in charge).
